

The Phaesun Group specialises in off-grid solar energy systems.

Phaesun France, in cooperation with its mother company in Germany brings electricity to areas where no electricity grid is available by providing custom designed solar energy systems. With a small team of engineers and a wide network of suppliers and customers, Phaesun designs and develops stand-alone solar power systems according to customer needs. Our customers are located all over the world but are mainly concentrated in the Middle East, French overseas territories and Africa.

As a system designer / engineer at Phaesun France, you are responsible for the technical development of the solar projects and will support the sales team during the offer stage and during the execution of the projects.

From the 01.11.2022

Electrical engineer for off-grid solar systems (m/f/d)

Your area of responsibility:

- Verification of technical specifications
- Technical advice
